PROGRAMMING LANGUAGES

- Languages & Frameworks: **ASP.NET Core**, ASP.NET MVC, WPF, Node.js (Express)
- Databases: SQL Server, **MySQL**, Oracle, **MongoDB**, **Redis**
- Cloud & DevOps: **AWS** (EC2, ECS, RDS, Lightsail), **Azure** (OpenAI, Cognitive Search), **GitHub Actions**, **GitLab** CI/CD, **Jenkins**, **Ansible**
- AI & LLMs: OpenAI & Azure OpenAI, Prompt Engineering, **LangChain**, **RAG**, Hugging Face, Ollama, ComfyUI (SDXL), LLM Fine-tuning & Deployment
- Vector Search: **Qdrant**, Chroma, **Embeddings**, Hybrid Search, Image Search Systems
- Infrastructure: DNS Management (Route 53, GoDaddy, HostGator), Git.

EDUCATIONAL BACKGROUND

Bachelor of Engineering (B.E.) in
Electronics and Communication
Engineering
Government Engineering College,
Hassan (GECH), Karnataka

PROFESSIONAL SUMMARY

Software Engineer at Airilab with expertise in designing and developing scalable backend applications using .NET Core, ASP.NET MVC, Node.js, AWS, and Azure. Experienced in cloud infrastructure, CI/CD, deployment automation, AI-powered solutions (LLMs, RAG, and intelligent agents), and system architecture. Passionate about building secure, high-performance software and innovative technology products.

URL:- <https://airilab.com>

WORK EXPERIENCE AND PROJECTS

AIRILAB | OCT 2025 - PRESENT

AIRILab :- Microservice Architecture (JAN 2023) - Ongoing

<https://airilab.com>, <https://global.airilab.com>, <https://europe.airilab.com>

- Developed and optimized **APIs** and **RAG** pipelines, improving workflow efficiency.
- Implemented **WeChat SSO**, **Alipay payments**, and **AI agents** while improving application security

PROMENA | OCT 2020 - OCT 2025

HealthEtile:- CQRS Architecture (May 2024)

<https://healthetile.io>, <https://portal.healthetile.net>

- Developed and implemented strategies for continuous **data acquisition at 25 Hz/s and 100 HZ/s frequency**, processing up to 30 hours of data.
- Setup a scheduler for **anomaly detection** for heartbeat (supervised learning model) using ML.Net and Automated the deployment process using **GitHub Actions** and **setup the AWS infra**.
- Created various API's** required for the Web and mobile application.

The DataFlow Group:- MVC Architecture (Mar 2021 - Jan 2023)

<https://dha.dfgateway.com>, <https://www.dfgateway.com>

- Created a new agent login system**, increasing agent productivity by **30%** by enabling agents to fill out forms on behalf of customers, streamlining the verification process.
- Implemented MiGS** by sending **payment** link though mail to **customers**, enhancing payment module and ensuring secure, smooth transactions within the **DHA** and **CCP** systems.

Saina health:- Monolithic Architecture (Oct 2020 - Mar 2021)

<https://www.sainahealth.com/>

- Developed various APIs** for the admin panel, improving operational efficiency by **10%** with features such as **Excel file** uploads, **PDF** generation report creation.
- Integrated AWS upload processes** that improved data security and handling, ensuring **HIPAA compliance** and reducing **data breach risks** by **20%**.
